

MAHSA International Dentistry Conference 2021 (Mi-DENT-2021)

DENTAL EDUCATION SYMPOSIUM 2

Date: 24th September 2021

Time: 14.00 pm – 15.30 pm

Clinical-based Education in Oral Surgery, Oral Medicine, Dental Radiology and Human Disease

Oral medicine, Dental Radiology, Oral Surgery, and Oral Pathology are the disciplines of dentistry that identify and manage diseases affecting the oral and maxillofacial regions and investigate the causes, processes, and effects of these diseases. Oral medicine is also concerned with the oral health care of medically complex patients, and with the diagnosis and non-surgical management of medically related disorders or conditions affecting the oral and maxillofacial region. Various systemic human diseases do have oral components which may need immediate attention.

The teaching methodology for Oral Surgery, Oral Medicine, Dental Radiology, and Human Disease is continually changing to accommodate for the changing landscape of education moving into the digital technology era. The need to create interest and understanding for the students in this new generation has led to many innovative methods of clinical-based teaching and learning strategies.

The world is seeing a transition from traditional face-to-face teaching to case-based and team-based learning models. Virtual microscopy and radiology, interactive clinical-based learning for problem solving have also been found to be more effective teaching methods. With the COVID-19 pandemic, teaching and learning are starting to see much dependence on these virtual modes of teaching with increasing use extending to other areas such as the virtual ward rounds. Online formative assessments and feedback sessions can be valuable tools during this period of virtual teaching.

This symposium/forum will bring together experts from different countries to share their experiences and/ highlighting their innovative teaching methods. Strategies employed by the different Dental Schools in trying to effectively train dental students in this pandemic era will be discussed.

Moderator

Assoc. Prof. Dr. Deepak Pateel G S
*Associate Professor in Oral Pathology
Faculty of Dentistry, MAHSA University*

Panelist Speaker 1

Prof. Dr. Rahmi Amtha
*Professor in Oral Medicine
Faculty of Dentistry
Trisakti University, Indonesia*

Panelist Speaker 2

Assoc. Prof. Dr. Rama Krsna Rajandram
Associate Professor / Consultant in Oral and Maxillofacial Surgery, Faculty of Dentistry University Kebangsaan Malaysia (UKM), Malaysia

Panelist Speaker 3

Prof. Dr. Phrabhakaran A/L Nambiar
Professor in Forensic Dentistry and Dental Radiology, MAHSA University, Malaysia

Panelist Speaker 4

Assoc. Prof. Dr. Haizal Mohd Hussaini
Associate Professor in Oral Pathology, Faculty of Dentistry, University of Otago, New Zealand
